SKILLS

- Programming Languages: Java, Python, C++
- Web Technologies: HTML, CSS, JavaScript, Django
- Database Tools: MySQL, XAMPP
- Data Analysis & Visualization
- Data & BI Tools: Power BI, Excel
- Core Concepts: OOP, DBMS, Data Structures & Algorithms

ACHIEVEMENTS

- University 1st Rank Holder in BCA
- Secured 10th Rank in LBS MCA Entrance Examination
- HackerRank Gold Badge in Python

STRENGTHS

- Strong analytical and problem-solving ability
- Strong teamwork and communication skills
- Quick learner, adaptable to new technologies

CAREER OBJECTIVE

Motivated MCA student with strong analytical and problem-solving skills, seeking an entry-level opportunity through TCS iON NQT to apply programming, data handling, and logical reasoning skills while contributing to innovative and scalable technology solutions.

EDUCATION

Master of Computer Applications (MCA) 2025- 2027

TKM College of Engineering, Kollam – APJ Abdul Kalam Technological University

Bachelor of Computer Applications (BCA) 2022-2025
University of Kerala – CGPA: 9.24/10

PROJECT & PRACTICAL EXPERIENCE

Tata Data Visualisation Job Simulation – Forage (Jan 2026)

- Cleaned and validated real-world retail data by removing invalid quantities and pricing errors
- Built executive-ready dashboards in Power BI/Tableau to analyze revenue trends, top customers, and country-wise performance
- Identified seasonal patterns and expansion opportunities, and presented forecasting-focused insights to simulated CEO and CMO

ACADEMIC PROJECTS

ComplaintEase – Sentiment Analysis Web Application

- Built a complaint management system with automated sentiment classification (Positive, Negative, Neutral)
- Applied NLP techniques to analyze complaints and generate insights
- Developed user and admin dashboards with data visualization

Aikyam – Kudumbasree Project (Python Django)

- Built a web platform to manage Kudumbasree activities and connect members with opportunities.
- Integrated user authentication, database models, and admin dashboards using Django.

DriveEasy – Car Rental Management System (Java)

- Developed a web-based Car Rental Management System using PHP and MySQL, implementing user registration/login, vehicle listing, online booking, payment processing, and secure password hashing.
- Designed and managed a normalized relational database (3NF) and built an Admin Dashboard to manage vehicles, brands, bookings, users, and feedback using HTML, CSS, Bootstrap, and JavaScript for a responsive UI.
